OBJECTIVE

Experienced IT professional with excellent problem solving, communication, and organizational skills seeking a challenging and fulfilling opportunity to utilize my passion for streamlining and automating repetitive tasks and processes for a wider audience

EXPERIENCE

2021-Current Tier2 Support Engineer / Systems Administrator II, Clear Guidance Partners, Austin, TX

- Senior technical escalations resource across multiple helpdesk and engineering teams
- Mentored and supported helpdesk technicians across multiple teams
- Developed and maintained tooling and automation using PowerShell and vendor APIs
- Worked with Engineering team to develop & test automation using internal RMM system
- Developed new and streamlined existing client user onboarding processes and procedures
- Spearheaded the engineering of multiple solutions vendors into MSP Product Stack
- Facilitated internal R&D for several client engineering projects

2015-2021 CTO & Managing Partner, Business Integrated Network Solutions, LLC

- Directed technical and business operations of a Managed Services Provider that served a variety of industries including healthcare, legal and professional services, municipalities, oil & gas, manufacturing, and financial institutions
- Technical operations duties included, but were not limited to: RMM & PSA implementation and administration, automation & scripting, escalations, projects engineering, etc.
- Engaged with key stakeholders in sales, account management, and strategic vCIO consulting

2013-2015 Network & Systems Administrator, Texas Visiting Nurse Service, LTD

- Designed, implemented, and supported network, server, and security infrastructure including firewalls, SIEM, and endpoint security. Led DevOps and Site Reliability engineering for internal software tooling and a complex SaaS LOB application for the Texas Healthcare Market

2012-2013 Network Technician, Texas Visiting Nurse Service, LTD

- Supported and troubleshot corporate network infrastructure including routers, switches, MPLS, T1, PRI, and fiber circuits, internal/edge firewalls

2010-2011 Computer Support Specialist, Harlingen Consolidated Independent School District

- Provided helpdesk support to campus staff, hardware repair, and structured data cabling

2007-2010 System and Network Administrator, South Padre Business Systems Inc

- Installed, managed, and repaired computer, network, servers, and business POS systems

EDUCATION, CERTIFICATIONS

2011-2012 AAS Information Security, Texas State Technical College (48 of 60 Credit Hours)
